TSS Courier (Inward Outward)

TSS Courier helps you centralize and manage your company's Inwards and Outwards, and provides related features that not only make regulatory compliance easy, but also save time, increase staff efficiency, and utilize resources effectively.

Salient Features

- ✓ **Outward:** Track of the status (Sent/Received/Returned etc) of each document like Hand Delivery / Courier / Register / Post.
- ✓ **Inward (Two Levels)**
Manage all your Inwards by keeping track of the status (Received/Confirmed). Two Level here is that if an Inward is recorded as "Received by User X" at the reception, then the user X can login to the application and confirm that it was indeed received by him.
- ✓ **Scan your PODs / Booking slips** and attach hundreds of them by one click.
- ✓ **One Click Email to client:** Allows you to send an email immediately to the client the information about dispatch and the scanned POD during a complaint.
- ✓ **Extensive Permissions:** Allows you to define extreme permissions which can restrict user to only view or send only particular documents or view specific inwards.
- ✓ **Activity (Audit Trail)**
The application lets you keep a track of every action of every user. For example, you can view outwards that were deleted by a particular user, or see a history of all correspondence addresses of the client, and which user modified it etc.
- ✓ **Label Printing:** Save time by printing Client Names and addresses on labels which are highly customizable. With just two clicks you can print labels for each outward that was sent today.
- ✓ **Extensive Search:** Allows you to search documents sent to a client for a period, allows an address based search / document based search.
- ✓ **Family wise courier** option which allows saving man power & costs
